Spirularin®

NAIL SPRAY

NAIL SERUM

STEP 1 IN YOUR PODIATRY PRACTICE:

Remove all nail sections affected by a fungal infection, e.g. using a urea occlusive dressing (40%/48h)

STEP 2 AT HOME:

Care for and strengthen the nails using Spirularin® NAIL products

Simply apply twice daily to all 10 nails and surrounding dermal tissue.

OUR RECOMMENDATION
AS THE IDEAL ADDITION TO YOUR
FOOT CARE RANGE

Care and regeneration of problematic nails with microbial protection

Our products **Spirularin® NAIL SPRAY** und **NAIL SERUM** contain moisturising and nourishing ingredients such as witch hazel, natural betaine, jojoba oil and liquorice root. In addition, the patented microalgae active ingredient Spiralin® gives natural microbial protection.

What is Spiralin®? The active ingredient Spiralin® found in **Spirularin® NAIL SPRAY** and **NAIL SERUM** is extracted from the microalga *Spirulina platensis*. Microalgae of the *Spirulina platensis* genus are 3.6 bn years old and are among the oldest living organisms on earth. The secret of these masters of the art of survival are the special defence mechanisms they have developed against natural enemies such as bacteria, fungi and viruses.

The inhibitory effect Spiralin® has on the phyla of fungi which can potentially damage skin and nails is extremely well developed. The special anti-microbial properties of the microalgae are activated and intensified in a patented refining process.

Our special products for dry skin and feet

Spirularin® GEL

for dry skin and feet
with extra moisturising betaine complex
and antimicrobial properties.

Spirularin® MOUSSE plus
