## MOUSSE

plus

For very dry skin and feet

INTENSIVE CARE WITH MICROALGAE ACTIVE PROTECTION

- ALSO SUITABLE FOR DIABETICS -

# Spirularin® MOUSSE plus

## For very dry skin and feet

Very dry, sensitive and rough skin needs special care. Spirularin® MOUSSE plus boosts the skin's ability to regenerate and also protects against pathogenic bacteria with the double concentration microalgae extract Spiralin®. This also helps to maintain the skin's barrier function.

Other special properties include effective moisture retention through 10% urea and extremely fast absorption into the deeper layers of the epidermis, meaning you can put on socks and clothing immediately after application. This makes Spirularin® MOUSSE plus the ideal specialist care for your skin and feet, leaving your skin soft and supple.

## Active ingredients

### Spiralin® microalgae extract (double concentration)

- Protects against bacteria and therefore is ideal for diabetics
- Improves cell regeneration
- Cell protection

### 10% urea

- Natural component in the skin
- Improves the skin's ability to retain water
- Leaves your skin soft, supple and elastic

### OPM-formula

- Microalgae extract distributes evenly, even in the deeper layers of the epidermis
- Forms a non-occlusive barrier

- Paraben-free
- No synthetic scents
- No occlusive oils
